WORK EXPERIENCE

APPLE

12.2022 - PRESENT

Genius; East Rutherford, NJ

- Diagnose and resolve complex hardware and software issues across Mac, iPhone, and iPad using Apple-certified procedures, advanced troubleshooting, and root-cause analysis.
- Mentor technicians on diagnostics, repair procedures, technical documentation, and customer engagement while supporting escalated technical issues and improving team repair workflows.
- Leverage cross-platform hardware/software expertise to troubleshoot configuration, interoperability, and performance issues beyond standard repair scenarios.

PROJECTS & SOLUTIONS

- Identified an undocumented MacBook lid-angle sensor failure mode, validated the root cause, and escalated findings to Apple RTA Engineering, resulting in a support-guide update; solution adopted across a 21-store market and recognized by leadership.
- Discovered an undocumented trackpad flex connector failure mode in MacBook Air 2021+ models, linking it to no-power conditions and validating flex replacement as an alternative to costly logic-board replacement, improving repair accuracy and reducing unnecessary part replacement.

ASURION

07.2020 – 12.2022

Lead; Paramus, NJ

- Led technical repair operations across Apple, Samsung, and Google devices, overseeing diagnostics, component-level troubleshooting, repair execution, quality control, and workflow prioritization.
- Diagnosed and repaired laptops, desktops, smartphones, tablets, wearables, and gaming systems using systematic hardware/software troubleshooting, component replacement, functional testing, and post-repair validation.
- Managed technical inventory and parts operations, including procurement, asset tracking, stock organization, device intake, and buyback processing while training technicians on repair procedures and troubleshooting.

EDUCATION

Southern New Hampshire University, Manchester, NH

2026 – PRESENT

Bachelor of Science in Information Technology

University of Technology, Krakow, Poland

2011 – 2015

Bachelor of Science in Cartography

TECHNICAL SKILLS

Hardware & Systems: Hardware Diagnostics, Component-Level Troubleshooting, Hardware Repair, System Testing & Validation, Device Lifecycle Management

Operating Systems: macOS, iOS/iPadOS, Windows, Terminal/Command Prompt

Technical Operations: Root-Cause Analysis, Technical Documentation, Asset & Inventory Management, Escalation Management

Certification: Apple Certified Support Technician (ACST)

LANGUAGES

English: Professional Proficiency / **Polish:** Native Proficiency / **Ukrainian/Russian:** Conversational / **Spanish:** Conversational
